

HOW INRANGE WORKS

Using advanced radar technology, the Inrange system will track your ball with pin-point accuracy. The system was built to give you all the information you need to analyze and improve your game - like a pro!

How it will help you

Accuracy

Tracking your ball flight, precise bounce and roll & being able to choose between **range & premium ball distances** will help you work out exactly which club to use out on the course.

Consistency

With Tee & Target mode & advanced **ball dispersion** maps, you will be able to hone in your ability to aim pin high and hit the same shot over and over again.

Fun

There are fun **challenges** you can play to improve your ability to make 'pressure shots' when you need to. There are range leaderboards in each category so it's game on!

THE FUN STUFF

Inrange+ is a multiplayer golf experience for everyone. Whether you want to up the stakes with your golf buddies or just have a fun night out with friends - give it a go!

How it works

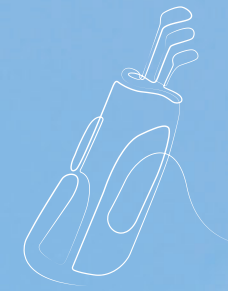

- Each player enters their name and skill level at the start.
- Get into the games and have fun, the winner of each game gets a point.
- Have the most points at the end, and you're crowned the winner!

Leaderboards

There are leaderboards for both single and multiplayer players so check your range TV screens to see how well you're doing against the rest of the pack.

*Inrange+ only available on touchscreen devices

THE
DRIVING
RANGE

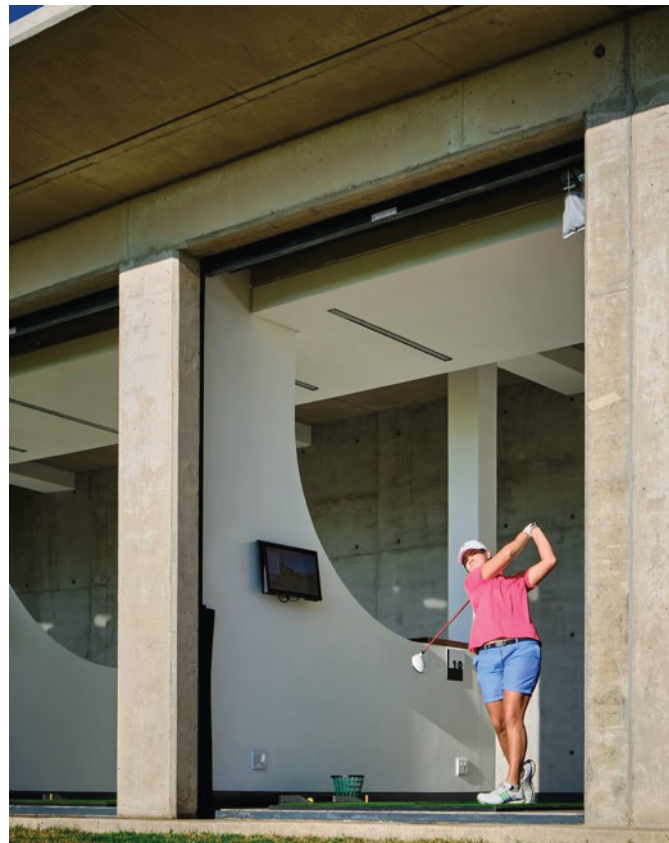

GETTING STARTED

At Hazendal, you can access Inrange on your mobile phone or by using one of the touchscreen devices. Either way, the first step is the same...download the Inrange App.

ONCE YOU HAVE THE APP - WE FIND IT EASIEST TO FOLLOW THESE STEPS:

- 1 When you arrive, check in with reception (if you've booked a touchscreen device, ask for an Inrange PIN).
- 2 When you get to your bay, open the Inrange App. Mobile phone users: select your bay number in the app. Touchscreen users: use the QR code in the app to login on the touchscreen.
- 3 Once you're logged in, put your phone in the phone holder (if you're using a touchscreen device, you can put your phone away) and start hitting.
- 4 You hit, we track! Enjoy your time on the range and try all the modes on offer.
- 5 Logout when you're done by hitting 'end session' and head off the range.
- 6 All your session data and stats can be reviewed in the Inrange app from the comfort of your couch later that day.

THE CURRENT GAMES YOU CAN CHOOSE FROM ARE:

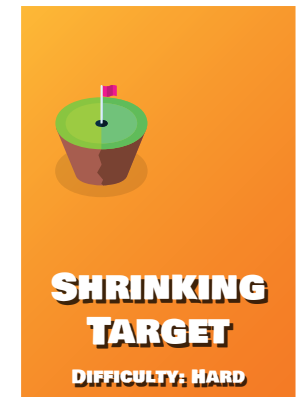

Grip it and rip it! The game is simple, see who can hit the furthest.

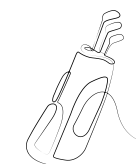

The closer to the pin, the higher your score. Can you get enough to win?

Are you feeling lucky? Aim for the cards you need to get closest to 21.

Hitting a target once is easy, but can you do it again?
